

PREPARATION OF MANUSCRIPTS FOR THE SPRAT XIX CONFERENCE

A. B. Author One
Company X, City, State

C. D. Author Two
Company Y, City, State

Papers received for SPRAT XIX will be compiled and published without editing or retyping. Therefore, please take special care that your manuscript is clean and accurate and follows the prescribed format to ensure uniform appearance throughout the volume. Because we are publishing the proceedings on a CD-ROM, there is no page limit on the papers, and color graphics and photographs are encouraged.

Papers should be typed single spaced, one column, in 10-point Helvetica. Standard 8.5 x 11 or A4 paper must be used for the text. The text, including figures and tables, should fit inside a 7 by 9 inch (17.8 by 22.9 cm) rectangle, allowing for 0.75 inches each for left and right margins, and one inch each for top and bottom margins (or 1.6 cm left and right, 2.5 cm from top and 4.3 cm from bottom for A4 paper). Please do not staple the paper.

The title of the paper should be typed in all capital letters on page 1, 2 inches (5 cm) below the top of the page and centered. The authors' names should be listed two lines below the title, followed by the company or affiliation and the city, state, and zip code, both single spaced below the authors. Note that subdivisions and street addresses should not be used.

The text should begin two lines below the city and state line. There is no need to include the abstract in the paper. Start page 2 and succeeding pages one inch (2.5 cm) below the top of the page. Do not start each section on a new page, and do not end a page with a heading. Please write the page numbers *only* near the top on the *back side* of each page.

ELECTRONIC FORMATTING

This year we will be publishing the proceedings on CD-ROM. In addition to two paper copies, we are requesting that each author submit an electronic version of his or her paper. The preferred format is a .pdf file, as produced by Adobe Acrobat, and readable by Adobe Acrobat Reader. If producing a .pdf file is not possible, the next best alternative is to submit a Microsoft Word file, which we will convert to .pdf. We can also convert PostScript to pdf format. Papers are due at registration.

TABLES

Tables may be in color or black and white. If tables are not interspersed in the text, they should appear after the text and before the figures. Units should appear in the column headings. No commas or spaces should be used within four-digit numbers. Tables should be numbered in arabic numerals. The table numbers and titles should be typed at the top of each table.

FIGURES

Figures may be in color or black and white. Figures that are scanned should be at a resolution of 300 dpi. The final size of the letters labeling each figure should be the same or larger than the size of the letters used in the text. Figures should be numbered in Arabic numerals. Figure numbers and captions should appear at the bottom of each figure. Figures that are completely words or equations are not considered illustrative material for the final publication. This information should be incorporated in the text and should not be referred to as figures.

Copies of photographs should be scanned at a resolution of 150 dpi. Scanned photographs should have at least 256 colors and black and white photographs should have at least a 256 level gray-scale.

SYMBOLS

All symbols should be defined where they are introduced or in a symbol list. Unusual abbreviations should also be defined where they are first used.

REFERENCES

The reference section should include only documents that are generally available. Personal communications, papers for internal use of specific groups, and "papers to be published" should not be cited. They may, however, be acknowledged by a parenthetical note in the text.

Include author's name, title of article, report number (if given), source (publisher or agency), page numbers, and dates. Below is an example:

Phillip Jenkins, David Scheiman, David Brinker and Joseph Appelbaum, "Low Intensity Low Temperature (LILT) Measurements and Coefficients on New Photovoltaic Structures," Proceedings of the 25th Photovoltaics Specialists Conference, pp. 317-320, Washington D.C., May 13-17, 1996.

When citing references, either use the word "reference" followed by a number, or type the reference number inside a parentheses. The references should be numbered consecutively in the order of their mention.
